

AVIAN GUITARS

Introducing the new upgraded Avian Hawk Guitar and Avian Condor Bass ranges

Hawk IP

This line of electrics from Avian represents all that is good in solid body guitars.

With its' unmistakable shape and superb finish the guitar kicks off by pleasing the aesthetes amongst us. Add to that a generous dollop of electronic wizardry from master designer Harry Fleishman and we have a guitar to be proud of. We are proud to make it and know you will be proud to own it.

Hawk comes in two distinctive styles:

The introductory Hawk has a nicely shaped in line peg head with classic black tuners and hardware.

There are three pickups, 2 single coils and a humbucker utilized by a 5 way switch that allows for some amazing combinations, producing all the sounds a player could ever need. The tunematic bridge means intonation need never be a problem and the guitar comes with an optional whammy bar at a slightly higher cost. All this with 8 colour options and a gig bag thrown in for good measure!

Hawk CH

This upgraded version of the Hawk comes with a unique scroll headstock mounted with either gold, black or chrome finish hardware. The pickups are mounted in the same configuration as the Hawk IP giving the same fantastic range of tones via the 5 way toggle switch. A tunematic bridge and optional tremolo unit complete the package, all mounted on a figured maple capped hardwood body in a choice of 8 colour ways. The Hawk CH is hard to resist as it comes with hard case and the usual Avian satisfaction guarantee.

Condor IP Bass Guitar

This 4 string bass borrows its' shape from the Hawk and the IP comes with an inline peg head and chrome, gold or black hardware. The 2 bass pickups produce good highs and lows accommodating a great range of different bass styles. Like the Hawk, the Condor comes in a choice of 5 colours and a complimentary gig bag.

Condor CH Bass Guitar

The CH has all the trimmings of the IP but has the fabulous cello style scrolled head stock mounted with gold, black or chrome finish hardware and 2 great sounding bass pickups. All the colours and a hard case complete the package.

Swift

Making its worldwide debut is the wonderful new Swift 6 string Range. With three different decorative woods on the body and a completely innovative shape the Swift is certainly a great eye pleaser! Manufactured to our usual high standards, the upper model using Seymour Duncan pick ups, the Swift sounds amazing as well as playing like a dream.

Come check it out!
