SKB’s New Line 6 HELIX or Kemper Rack with Floor Controller

Orange, CA — SKB is pleased to introduce the 3i-231714GFX iSeries Waterproof FlyRack Case. The 3i-231714GFX 4U Guitar FX FlyRack allows for transport of both the Line 6 HELIX or Kemper Profiler guitar processor rack equipment and a foot controller all in the same case.

This case was designed specifically for the Kemper Profiler and Line 6 Helix rackmount processors and foot controllers. The top tray features robust ABS plastic and high density foam, with precut holes to perfectly match the foot controller feet and prevent movement or shifting within the case. Below the top tray is a 4U injection molded rack frame that can hold the guitar processor with one additional space for a power supply, recording interface, or other equipment. Rear rack rails also provide options to mount other equipment or pass through connections. This case also comes standard with a pull out handle and wheels for convenient transport.
The 3i-231714GFX iSeries FlyRack Line 6 HELIX or Kemper Profiler Rack and Floor Controller is made in the U.S.A. and available now with a street price of $479.99.

For additional information about the 3i-231714GFX iSeries FlyRack, or any of SKB’s innovative transport cases, visit the SKB Summer NAMM Booth 313 or please contact SKB Music/Pro AV Sales at (800) 410-2024 or visit skbcases.com/music.
