FOR IMMEDIATE RELEASE

MALEKKO UNVEILS SIX NEW EURORACK MODULES AT NAMM 2018

MANTHER GROWL + DRUM + QUAD ENVELOPE QUAD LFO + QUAD VCA + RANDOM

Portland, OR - JANUARY 24th, 2018 - Malekko announces five new Eurorack modules at NAMM 2018 and on the heels of the Varigate 4+, Gate Delay, Voltage Block and Varigate 8+ that will further expand music creation and push the boundaries of modular synthesis.

MANTHER GROWL is the Eurorack version of the soon to ship MANTHER tabletop synth. Expect all of the same analog features of this growling beast complete in 26hp.

DRUM is a completely customizable, 4-channel drum synthesizer. A huge feature is the ability to record automation of settings for each of the four outputs, then save that automation to stand-alone presets or as presets within the Varigate 4+ and Varigate 8+, extending memory capabilities to 100 slots. It will prove to be a must have for percussion in Eurorack.

QUAD ENVELOPE and **QUAD LFO** (individual modules) include 4-channels of ADSR and LFOs respectively with a multitude of functions including recordable automation as well as the ability to save presets that are recallable using the both Varigate 4+ and Varigate 8+ or stand-alone memory.

RANDOM boasts 11 total outputs of random voltages (8 individual outs + 3 sequenced outputs), selectable randomizing algorithms as well as a voltage controlled or manual freeze function.

QUAD VCA is a BIG update to the original VCA, now with 4 individual inputs and outputs, CV on all independent channels, an additional mix output and mute switches.

2018 will be yet another exciting year for this synth format and Malekko is keeping it fresh and innovative as usual!
